

Ehrlich Pest Control
School IPM Policy

Ehrlich Pest Control will coordinate and facilitate the Bishop Schad Regional School District's pest management plan in accordance and cooperation with the New Jersey School Integrated Pest Management Act of 2002.

Specifically, Ehrlich will facilitate a program applying IPM principles. This approach embodies an ideology of preventing unacceptable levels of pest damage by the most economical means and with the least possible hazard to people, property, and the environment.

Non-pesticide pest management methods will be used whenever possible. The choice of using a pesticide shall be based on a review of all other available options and a determination that these options are not effective or not reasonable. When it is determined that a pesticide must be used, low impact pesticides and methods are preferred and shall be considered first.

All pesticide applicators will be thoroughly trained in appropriate components of IPM as it pertains to the school environment.

Records of pesticide use shall be maintained on site by Ehrlich to meet the requirements of the state regulatory agency and the school board. Records shall also include, but are not limited to, pest surveillance data sheets and other pesticide pest management methods and practices utilized.

Ehrlich's IPM pest management plan will be facilitated in full cooperation with the Bishop Schad Regional School's designated IPM coordinator. Likewise, Ehrlich will ensure that all pesticide applicators follow state regulations, including licensing requirements and label precautions, and comply with all components of the school IPM policy.
